LETTER TO THE EDITOR

WEGNER, A., Treadmilling of Actin at Physiological Salt Concentrations. An Analysis of the Critical Concentrations of Actin Filaments	607
---	-----

Index to Volume 161

- Actin assembly, kinetic analysis suggests that tropomyosin inhibits spontaneous fragmentation of actin filaments, 217
 — treadmill at physiological salt concentrations: an analysis of the critical concentrations of actin filaments, 607
- Adaptation and sensing, simple molecular model based on receptor modification with application to bacterial chemotaxis, 395
- AIZAWA, S. (see also KATO, S.), 551
- Aligned images of biological particles, correspondence analysis, 134
- Alignment, computer, and correspondence analysis used in comparison of 4×6-meric hemocyanins from three different arthropods, 139
- AMALDI, F. (see also NARDELLI, M.), 353
- ARAD, T. (see also CHANG, J.-J.), 579
- ARNDT, K., NICK, H., BOSCHELLI, F., LU, P. & SADLER, J., Repressor-operator interactions in the *lac* operon. III. Nuclear magnetic resonance observations with altered amino-terminal DNA binding domains, 439
- ARLINGHAUS, R. B. (see also JUNGHANS, R. P.), 229
- ARNDT, K. (see also NICK, H.), 417
- Arthropod 4×6-meric hemocyanins, comparison using computer alignment and correspondence analysis, 139
- ASAKURA, S. (see also KATO, S.), 551
- Assemblage, native bare zone, nucleates myosin filament assembly, 505
- Assembly of actin, kinetic analysis suggests that tropomyosin inhibits spontaneous fragmentation of actin filaments, 217
- Bacterial chemotaxis and a simple molecular model for sensing and adaptation based on receptor modification, 395
- Bacteriophage T4 head gene 67 codes for a prehead core component, PIP. I. Genetic mapping and DNA sequence, 479
 —————, —. II. The construction *in vitro* of unconditionally lethal mutants and their maintenance, 491
- Bare zone assemblage, native, nucleates myosin filament assembly, 505
- Bases in B-DNA, mechanics of sequence-dependent stacking, 343
- BECCARI, E. (see also BOZZONI, I.), 353
- BEDOUELLE, H., SCHMEISSNER, Y., HOFNUNG, M. & ROSENBERG, M., Promoters of the *malEFG* and *malK-lamB* operons in *Escherichia coli* K12, 519
- BICKLE, T. A. (see also VOLKER, T. A.), 479, 491
- BIGNONE, F. A. (see also NICOLINI, C.), 155
- BIJLHOLT, M. M. C., VAN HEEL, M. G. & VAN BRUGGEN, E. F. J., Comparison of 4×6-meric hemocyanins from three different arthropods using computer alignment and correspondence analysis, 139
- BLANEY, J. M. (see also KUNTZ, I. D.), 269
- BOSCHELLI, F. (see also ARNDT, K.), 439
 — (see also NICK, H.), 417
- BOUBLIK, M. (see also FRANK, J.), 107
- BOZZONI, I., TOGNONI, A., PIERANDREI-AMALDI, P., BECCARI, E., BUONGIORNO-NARDELLI, M. & AMALDI, F. Isolation and structural analysis of ribosomal protein genes in *Xenopus laevis*. Homology between sequences present in the gene and in several different messenger RNAs, 353
- BRAMBILLA, G. (see also NICOLINI, C.), 155
- BUONGIORNO-NARDELLI, M. (see also BOZZONI, I.), 353
- CALLADINE, C. R., Mechanics of sequence-dependent stacking of bases in B-DNA, 343
- Calotropin DI, crystal and molecular structure at 3.2 Å resolution, 591
- CARLO, P. (see also NICOLINI, C.), 155
- CASTENSSON, S. (see also STENSLAND, B.), 257

- Cellular control of conjugation in *Escherichia coli* K12; effect of chromosomal *cpx* mutations on F-plasmid gene expression, 13
- CHANG, J.-J., LEONARD, K., ARAD, T., PITT, T., ZHANG, Y.-X. & ZHANG, L.-H., Structural studies of the outer envelope of *Chlamydia trachomatis* by electron microscopy, 579
- CHARNEY, E. (see also LEE, C.-H.), 289
- Chemotaxis, bacterial, and a simple molecular model for sensing and adaptation based on receptor modification, 395
- Chlamydia trachomatis*, structural studies of the outer envelope by electron microscopy, 579
- Chromosomal *cpx* mutations, effect on F-plasmid gene expression; cellular control of conjugation in *Escherichia coli* K12, 13
- Chromosome, monkey, single, structural organization of α -satellite DNA, 323
- Composite genes of yeast: formation of composite iso-cytochromes *c* by recombination between non-allelic genes, 373
- Conformation, solution, of DNA, 289
- Conjugation in *Escherichia coli* K12, cellular control; effect of chromosomal *cpx* mutations on F-plasmid gene expression, 13
- Correspondence analysis of aligned images of biological particles, 134
- — use in comparison of 4×6 -meric hemocyanins from three different arthropods, 139
- Cow α -lactalbumin crystallization, 203
- cpx* mutations, effect on F-plasmid gene expression; cellular control of conjugation in *Escherichia coli* K12, 13
- Crystal and molecular structure of the sulfhydryl calotropin DI at 3.2 Å resolution, 591
- Crystallization of cow α -lactalbumin, 203
- — human α -lactalbumin, 211
- Deoxymyoglobin crystals, Mössbauer spectroscopy, protein dynamics, 177
- DNA, α -satellite, in a single monkey chromosome, structural organization, 323
- fraction from Ehrlich ascites tumour cells containing the putative origin of replication, 77
- , native, from intact nuclei of mammalian cells, viscoelastic properties; higher-order DNA packing and cell function, 155
- : n.m.r. observations with altered amino-terminal DNA binding domains; repressor-operator interaction in the *lac* operon, 439
- replication, non-contiguous segments of the polyoma genome required in *cis*, 533
- —, R6K. I. Complete nucleotide sequence of an autonomously replicating segment, 33
- —, —, II. Direct nucleotide sequence repeats are required for an active γ -origin, 45
- — —, III. Regulatory properties of the π initiation protein, 57
- sequence and mapping for gene 67, a new, essential T4 head gene coding for a prehead core component, PIP, 479
- , solution conformation, 289
- B-DNA, mechanics of sequence-dependent stacking of bases, 343
- Ehrlich ascites tumour cells, isolation of a DNA fraction containing the putative origin of replication, 77
- Electron micrographs of ribosomes, use of multivariate statistical analysis; L and R lateral views of the 40 S subunit from HeLa cells, 107
- microscopic analysis of ts110 Moloney mouse sarcoma virus, a variant of wild-type virus with two RNAs containing large deletions, 229
- — structural study of modified fibrinogen microcrystals, 459
- — — studies of the outer envelope of *Chlamydia trachomatis*, 579
- microscopy, statistical procedures, 251
- EOYANG, L. (see also SAMBUCETTI, L.), 13
- ERNST, J. F., STEWART, J. W. & SHERMAN, F., Formation of composite isocytochromes *c* by recombination between non-allelic genes of yeast, 373
- Escherichia coli* K12, cellular control of conjugation; effect of chromosomal *cpx* mutations on F-plasmid gene expression, 13
- — —, promoters of the *malEFG* and *malK-lamB* operons, 519
- ESPOSITO, V. (see also ULLU, E.), 195
- Evolutionary conservation of the human 7 S RNA sequences, 195
- FENNA, R. E., Crystallization of cow α -lactalbumin, 203
- , — — human α -lactalbumin, 211
